## Guadalupe Valley Security

*PROFESSIONAL  
SYSTEMS DESIGN,  
INSTALLATION  
AND 24 HR. U.L.  
APPROVED LOCAL  
MONITORING*

Guadalupe Valley Security has been protecting homes and businesses against burglary, fire and medical #056692 emergency since 1982.

We sell confidence. Our customers can be confident in the knowledge that everyone and everything they value is safely secured by the advanced solutions that we provide.

### Underwriters Laboratory Certified Monitoring

In order for our monitoring center to be U. L. approved, we must adhere to certain standards and procedures that are designed to ensure that there is no way that our service can fail, even for a minute. They include:

**Reinforced Construction** - Our secure facility is bullet proof and constructed to withstand a hurricane or tornado.

**Uninterruptible Power** - In case of local failure, our battery powered UPS system will keep things running until our back up generators take over.

**Redundant Systems** - U. L. requires a monitoring center to have 2 receivers. That's the equipment that takes an alarm and immediately brings all of the customer's information to a computer screen. At Guadalupe Valley Security we actually have 3 receivers.

**Redundant Facilities** - In the very unlikely event that our main monitoring center should actually go down, all of our calls are automatically routed to our fully equipped back-up facility at a separate location.

**See the "Holiday Specials" article on the reverse side for savings on 24 hr. monitoring. Talk to one of our specialists about your security needs by calling (830) 885-2250 or toll free 1 (800) 835-4827.**
