GVTC EXPANDS ROCKY CREEK EXCHANGE LOCAL CALLING

In September 2003, GVTC members in the Rocky Creek Exchange (830-839) overwhelmingly voted to approve Expanded Local Calling Service (ELCS) to the Saturn exchange (830-540). This new service pending regulatory approval is scheduled to begin December 17, 2003.

ELCS is a two-way service that provides local calling to and from locations where normally customers would incur long distance charges. Callers are required to dial a ten-digit telephone number to call between exchanges. However, they do not have to dial one, since this is a local call. Since Rocky Creek customers already enjoy ELCS to Bastrop there are no additional monthly fees to add ELCS to Saturn.
